(a) fractal dimension of the total area vs driving rate
$\langle D^t \rangle$
ε
LH91 N=64: 1.74 ± 0.09
LH91 N=128: 1.80 ± 0.06
LH91 N=256: 1.84 ± 0.05
Det. whole, N=64
Det. cluster, N=64
Det. whole, N=128
Det. cluster, N=128
Det. whole, N=256
Det. cluster, N=256
(b) box-size window ($\varepsilon = 10^{-6}$)
$\delta = \ell_{\max}/N$
LH91
Det. whole
Det. cluster
N=64
N=128
N=256
(c) peak area vs driving rate
$\langle D^P \rangle$
ε
